wallpaper and mural installations

Customer Preparation for Wallpaper Installation

Please be sure to read and complete the following instructions prior to the actual day of wallpaper installation.

1. Please remove all **personal and decorative items** from the area, i.e., pictures, lights, drapes, blinds, and small appliances. If applicable, please empty medicine cabinets.
2. All furniture should be positioned at least **three feet** from the walls to be decorated.
3. A work area approximating 6'x9' will need to be provided in the room to be decorated or in very close proximity to accommodate equipment and materials such as a pasting table, tools, etc.
4. Room temperature where the installation is taking place needs to be between **70-72 degrees** during the paperhanging. This is needed to control adhesive drying.
5. Please plan to keep **pets and small children** away from the work area. Neither mix well with glue and razor blades.
6. Make arrangements to have **heavy appliances** or furniture such as pianos, refrigerators, safes, etc., moved the day before the decorating begins.
7. If applicable, please clean kitchen walls with a degreaser (ammonia and water - do not use detergent) and bathroom walls and tiles with mildew remover at least 24 hours prior to the paper installation. This will insure good bonding and minimize potential mildew problems.
8. If applicable, please remove all **electrical fixtures** such as doorbell hardware, electric plates, and thermostats.
9. Please be sure to leave an **emergency telephone number** if no one will be home during the actual installation of wallpaper.
10. Client use of nanny cams, cameras, recording devices are for security purposes only. Prior approval needs to be obtained to record my work and proprietary installation methods and tools.

Thank you very much for your cooperation. Your attention to these details will ensure smooth and efficient decorating of your home.
